EXPERIENCE

KSNR Services

Noida, India

Project Assistant

Mar-Jun '2022

- Assisted the HR department in recruiting new talent for both local and international branches.
- Contributed to the development of a white paper for the company's upcoming token and wallet release.
- Utilized Agile methodology while collaborating with the IT department, occasionally conducting functionality and usability testing for the website.
- Participated in video presentations explaining our new token and wallet.

Geop Systems

Gurugram, India

Data Analytics Intern, Business Analytics Intern

Jul-Oct '2021 & Oct-Dec '2020

- Optimized and assisted in interpreting data from 250 company clients using cohort analysis, regression analysis, and predictive and prescriptive analysis techniques.
- Contributed to the 'Collaboration with Companies' project, where I analyzed data from over 200 companies. This analysis focused on factors such as profitability, scalability, employer data, and costs using the Pandas library in Python for the purpose of collaboration.

Paytm

Noida, India

Risk Analyst Intern

Jan-Mar '2021

- Worked on the 'Risk in Offline Payment Industry' project, focusing on ensuring merchant safety from fraudulent payments, protecting consumers from dubious merchants, and authenticating both consumers and merchants on the Paytm platform.
- Enhanced the security of electronic card payments and streamlined the merchant onboarding process for electronic payments using secure code technology.
- Maintained a database of reported stolen or missing cards using a combined warning bulletin.

IM Stocks, India

Bulsa Analyst Intern

- Worked on the 'Corporate Dilation' project, addressing and resolving issues faced by over 170 clients related to IM stock software and services.
- Analyzed and optimized data from 300 company clients using R and regression analysis.
- Assisted the IM stocks team in redesigning the website based on client feedback and suggestions, streamlining the user experience.

- Led a team of **22 students** to facilitate placement and internship opportunities with top companies, including Tech Mahindra, Genpact, Deloitte, and Ernst & Young.

Career Guidance Cell

Delhi, India

Vice President

Jul 2020-Jul'2021

- Led a team of 45 students in organizing career development events, including financial literacy classes, stock market investing classes, and blog and web development classes.

Enactus

Core Team Member

Delhi, India

Jul 2020-Jul'2021

- Led and managed two critical projects (Annapurna and Ishita) with a team of 40 students, focusing on uplifting weaker sections of society.

KEY PROJECT

Sentimental Analysis of Twitter- R

March 2023

- The dataset was collected from various websites, which contained various errors.
- To conduct sentiment analysis, optimal usage of the jsonlite, ggplot2, syuzhet, and sentimental analysis packages was performed.
- Tweet anomalies such as special characters, numbers, single words, stemmed words, white spaces, and stop words were addressed. Additionally, the data was converted to ASCII and lowercase format using Vcorpus.
- Harvard dictionary, Henry's finance-specific dictionary, Loughran McDonald finance-specific dictionary, and QDAP were employed as tweet analyzers.
- Based on each analysis, positive, negative, and neutral scores were calculated and visualized using the ggplot2 package.
- The Sentimentr package was utilized to segregate positive and negative tweets into two different text files. A matrix was created to display the proper segregation between both types of tweets.

Causes of Car Accidents in South Australia-R

March 2023

- Data wrangling was performed on a CSV file containing over 13,000 rows and 33 columns.
- In Tableau, various columns were combined to analyze statistics and identify the different causes of car accidents.
- A customized Shiny app was developed in R, utilizing three libraries: Shiny, ggplot2, and dplyr. The app is designed to explore and visualize the discovered causes of car accidents.
- The Shiny app allows users to compare up to three parameters. It offers customizable color options, summary functions, and the ability to set maximum and minimum limits for both the x and y-axes.

X-Culture

July 2019

- Led an international business consulting project with a team of 5 members from Colombia, Ecuador, Thailand, and the USA.
- Played a leading role in providing business consultancy to Cocci Grifoni, an Italian wine-selling company, aimed at increasing their market capitalization. Presented SWOT analysis, marketing, advertising, distribution, pricing strategies (including shipping and registration costs), and revenue predictions.
